

In the last years it arose the number of misleading news about the immigrants and refugees in Romania. Due to the lack of studies and researches the social media were disseminating wrong information about their number and about their process of integration, country of origin, etc. Therefore, there was created the Immigrants' Integration Index in Romania. A research tool aiming to measure the level of immigrants integration and other more general aspects about their lives in order to be disseminated and used properly by the large public.

Main target group were the immigrants living in Romania. The secondary target group is the large public (academics, students, general population, etc.)

The Index was conducted in 2 different years: 2016-2017 and 2017-2018. Each year ended with a publication. The 2017 Index can be downloaded from the webpage of Migration Center or from the bellow webpage of the European Commission. The 2018 Index is in process. It will be published soon.

Main actions/activities:

- To collect data (face-to-face surveys and online surveys conducted at the national level)
- To collect data from public institutions dealing with immigrants (e.g. Minister of Education)

Results:

1. Quantitative
 - The creation of the Index where there can be found different integration dimensions of immigrants life in Romania (dimension work, dimension education, general context, etc.)
 - A publication of the Index
 - Participation at several interviews
 - Creation of some public events where different public institutions, NGO and people from the general public attended
